

MUHAMMED MUKHTHAR CM

Kerala, India • mukhtharcm@gmail.com • mukhtharcm.com • github.com/mukhtharcm

SUMMARY

Product Engineer with a focus on shipping working software. 1,400+ production commits across SvelteKit, Flutter, and Astro projects. Expert in **AI-Augmented Development**, using modern LLM workflows to architect and deliver complex systems with the velocity of a small team. Built and scaled "Festize" to handle thousands of concurrent users.

WORK EXPERIENCE

OdeByte

Remote

Founder & Lead Engineer

Jan 2024 – Present

- Founded a high-velocity development agency focused on rapid MVP delivery.
- Leveraging AI-augmented workflows (Cursor, Claude, Gemini) to reduce development time by 60% while maintaining code quality.
- Delivering full-stack web and mobile solutions using SvelteKit, Astro, and Flutter.

Festize

Kerala, India

Solo Architect & Lead Developer

Nov 2022 – Present

- Architected and built a complete Festival Management platform (festize.com).
- **Tech Stack:** SvelteKit, TailwindCSS, PocketBase, Cloudflare Workers.
- Engineered real-time scoring systems, automated scheduling algorithms for 100+ events, and judge management portals.
- Handled high-concurrency traffic during live festival events across multiple campuses.
- Shipped 800+ commits of production code, handling everything from UI/UX to database schema design.

Ma'din Academy

Kerala, India

Campus Systems Engineer

2022 – 2026

- Digitized complex campus operations, replacing legacy paper workflows with custom software.
- Built a multi-tenant Campus ERP system handling student data, attendance, and academic management.
- Developed the "MKIS Guide Selector" app using SvelteKit/PocketBase to manage research team allocations for 90+ teams.
- Implemented automated PDF report generation and Excel exports for administration.

VENTURES & OPEN SOURCE

OpenClaw (formerly Clawdbot/Moltbot)

TypeScript, Node.js, Docker, LLM Integration

- Maintainer (Open Source): contribute to production-impacting fixes, bug triage, and release quality for the agentic runtime environment.

AI Audio Kit

Native macOS Flutter App

- Native macOS Flutter app for audio processing.
- **Traction:** Generated \$300+ revenue from 50+ global customers.

AI SQL Assistant

Developer Tool

- Built and shipped a developer tool in 48 hours.
- **Exit:** Acquired for \$400 shortly after launch.

SKILLS

Core Stack: SvelteKit, Astro, Flutter, Dart, TypeScript, JavaScript, HTML/CSS.

Backend & Infra: PocketBase, Cloudflare Workers, Firebase, Node.js, SQL/SQLite.

Workflow: AI-Augmented Coding, Prompt Engineering, System Architecture, Rapid Prototyping.

Tools: Git, GitHub Actions, Docker, Linux Administration.

MOBILE APPS & PLATFORMS

ProperInvoice (iOS)

Swift, iOS SDK

- Professional iOS mobile application for creating, managing, and sending seamless invoices on the go.

Chat Notes (iOS/macOS)

Flutter, Offline-first

- Active note-taking app capturing threaded ideas in a familiar chat-like interface.

Ma'din !CON

Astro, GSAP

- Developed a highly dynamic, high-performance website for a major academic conference featuring complex GSAP animations.

EDUCATION

University of Madras

Remote

Bachelor of Computer Applications (BCA)

Graduated 2024

- Focused on core computer science concepts, software development, and system architecture.
